

E-Commerce Sales Analysis

A Data-Driven Insights Report

Introduction

- This dashboard helps stakeholders track and analyze e-commerce sales based on region, customer segment, product category, and profit contribution. It delivers data-driven insights to uncover trends, improve sales strategies, optimize inventory, and maximize profitability. The dashboard is designed for key stakeholders:
- E-commerce Executives & sales strategists
- Marketing & Product teams, Category Owners
- Finance & Business Analysts

Objective

- Monitor Sales Performance in Real Time by providing stakeholders with a real-time overview of total sales, total profits, time periods, and product categories
- Track Profitability by Product and Segment to guide pricing strategies and business decisions that improve overall profitability.
- Identify Sales Trends and Opportunities Visualize patterns, and growth opportunities through interactive visuals, helping stakeholders make proactive, data-driven business decisions.
- Reveal what works and what doesn't by pinpointing products and segments which work well with respective shipping modes and implementing targeted improvements.

Key Questions

- What are our total sales and profit across different time periods?
- Which products or product categories are generating the most sales and profit?
- Which shipping modes are frequently used and how do they impact sales and profit?
- What are the top and bottom performing products in terms of profit margins

Key Metrics

Insights

- Total sales represents the overall sales across all products
- Total profit shows the total amount of profit recorded
- Returned Orders percentage shows how many orders were returned

Measures (DAX Query)

- Total Profit = SUM(Orders[Profit])
- Total sales = SUM(Orders[Sales])
- % of Returned orders =
VAR _total_orders = DISTINCTCOUNT(Orders[Order ID])
VAR _return_orders = DISTINCTCOUNT>Returns[Order ID])
VAR _percentage =
DIVIDE(_return_orders, _total_orders)
RETURN _percentage
- Sales PY = CALCULATE([Total sales], SAMEPERIODLASTYEAR('Date table'[Date]))
- % change of sales (PY) = DIVIDE([Total sales] - [Sales PY], [Sales PY])
- Profit PY = CALCULATE([Total Profit],SAMEPERIODLASTYEAR('Date table'[Date]))
- % change of profit(PY) = DIVIDE([Total Profit] - [Profit PY],[Profit PY])
- % returned orders PY = CALCULATE([% of Returned orders], SAMEPERIODLASTYEAR('Date table'[Date]))
- % returned orders (PY) = [% of Returned orders] - [% returned orders PY]

Total Sales		Total Profit		% Returned Orders	
\$2.33M		\$292.30K		5.79%	
PY	\$1.58M	PY	\$196.37K	PY	8.74%
vs PY	47.16%	% change...	48.85%	vs PY	-2.95%

Total Profit by Product

Insights

- The vertical bars show the profit recorded for each product type.
- Products from Technology segment are promising and demonstrate strong profits.
- Two, out of four products from the Furniture category are bringing in losses, which indicates the segment is in a bad shape.
- Office supplies segment has more products than the other two segments, but still does not generate enough profit.

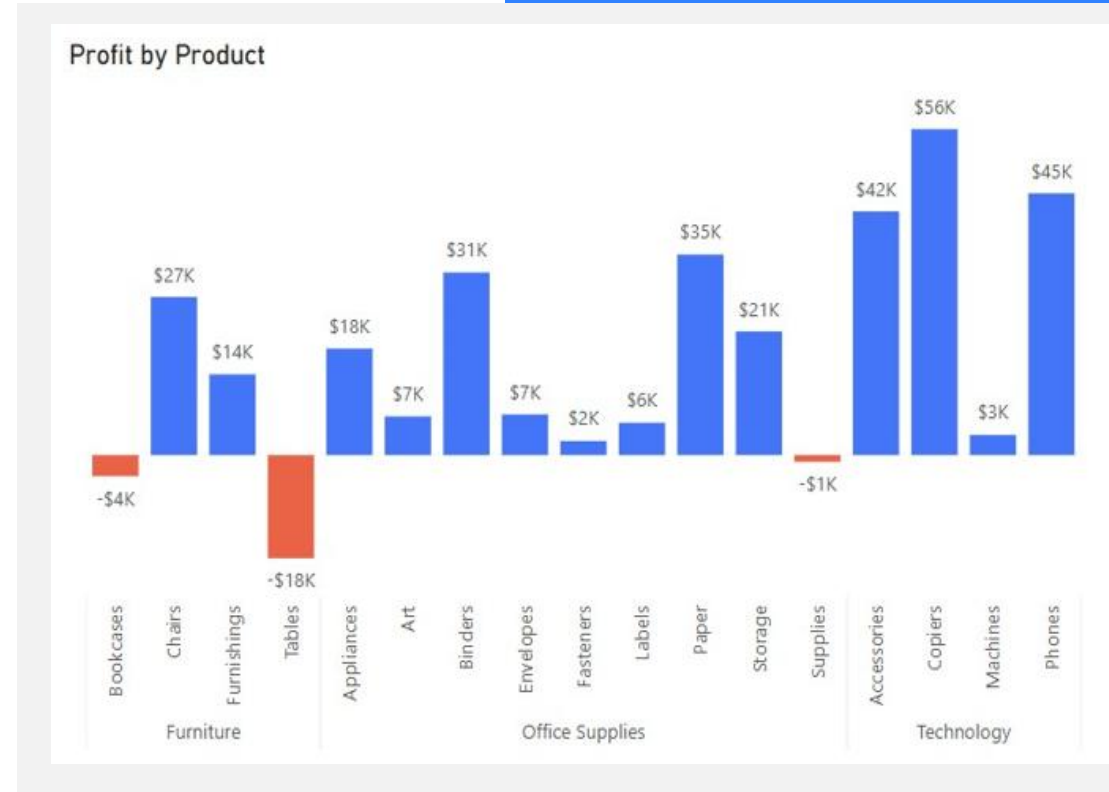

Challenges

Low profitability in certain products can be because of:

- Marketing & sales strategy issues for these specific products
- Competitors with better product, better pricing and better customer connection.
- Poor product market fit for furniture segment

Recommendations

- Leverage the marketing ideas of top performing products and apply in low performing ones
- Conduct competitor analysis to identify improvement areas
- Evaluate product market fit in low performing products and pivot accordingly

Total Transactions by Time

Insights

- The overall sales line shows an increasing trajectory.
- There are higher highs and lower lows which indicate the sales are climbing in a healthy manner.

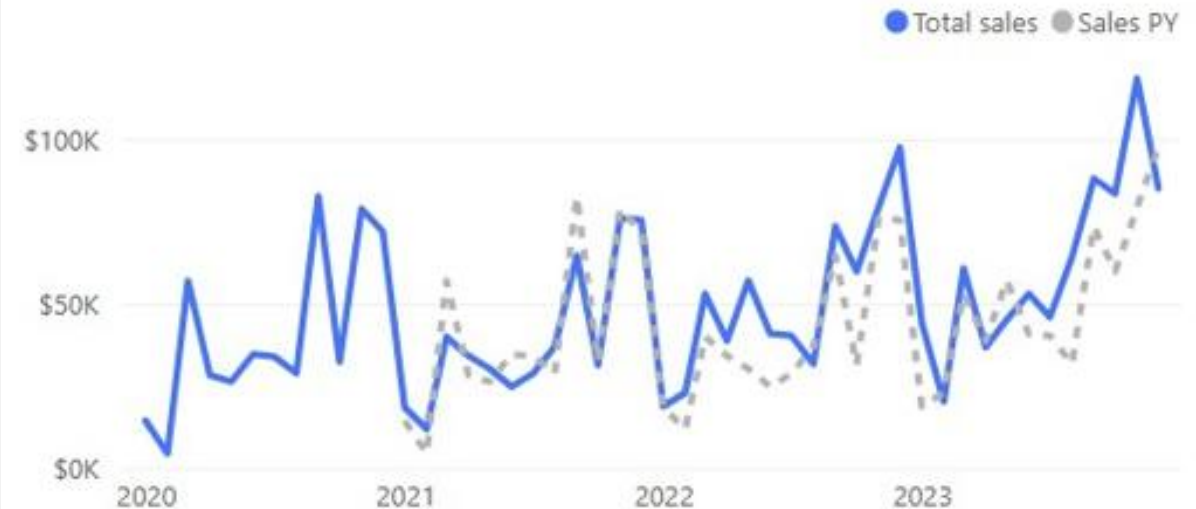

Challenges

- The start of the year usually has lower sales, indicating reduced customer spending
- Mid year also reveals lower sales which may result in lower quarterly sales and profit.

Recommendations

- Identify the reason why start and mid year sales struggle compared to year end sales.
- Develop clever marketing strategies to increase the first and second quarter sales .

Sales vs Previous year over time

Total Sales by Segments

Insights

- Key performer amongst all segments is Consumer segment, revealing the highest sales.
- Home office is segment recorded the lowest sales, and stood behind Corporate segment

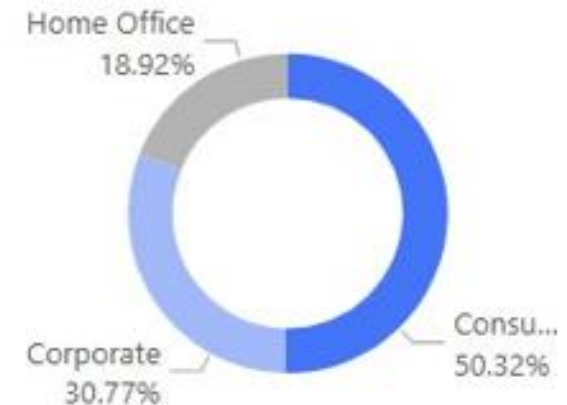

Challenges

- Home office segment is struggling to achieve enough sales, due to potential return to work policies.

Recommendations

- Implement novel marketing strategies to increase sales in the Home Office segment..
- Incentivize the products in Corporate segment to boost sales in both, individual and bulk orders.
- Apply the positives of Consumer segment in the other two segments to increase their sales share.

Sales by Segment

Total Sales by Ship Mode

Insights

- The clear winner here is the Standard Class ship mode, outperforming every other ship mode.
- Same Day ship mode is the least preferred compared to other modes
- First Class and Second Class ship modes are moderately used.

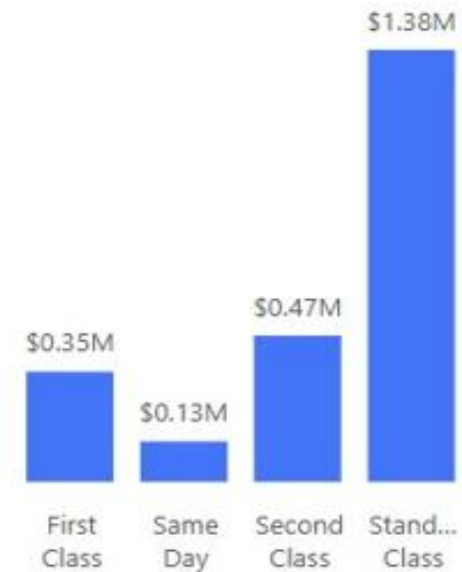

Challenges

- Same Day ship mode may not be preferred due to excessive costs.
- First Class and Second Class ship modes are still significantly lower compared to Standard Class and may fall further.

Recommendations

- Incentivize First Class and Second Class shipping modes to increase their usage.
- Same Day ship mode could be made limited to specific items to optimize its usage, considering its low contribution in sales.
- Maintain the strategic direction of Standard Class.

Sales by Ship Mode

Outcome

By implementing these insights and recommendations, stakeholders and bank managers can expect:

- Improved sales & profit - Boost sales and products across the poorly performing products and segments
- Turnaround underperforming segments - Gradually increase the sales for low performing segments.
- Consistent Growth - Sustainable YoY growth in terms of overall sales and profit.

As a result, a more profitable, well-balanced, and data-driven business with improved security and user experience, better regional performance, and stronger customer relationships.

Thank You!
